

KIDS HEART CHALLENGE

On behalf of the American Heart Association, we would like to thank all of the Concord Elementary School students, family and friends for your incredible generosity. With your hard work, we were able to raise \$7,968.78 this year. The American Heart Association estimates that this money will save 159 lives by helping to research heart disease and promote heart health. Since 2010, the Concord Elementary School community has raised \$105,885.08 for this important cause.

Thanks so much for making this fundraiser a success once again! Curious how the AHA uses your donations? Check out the chart below.
